COLLAGE MEANING

I chose these three pictures representing :

- Better education
- America being a land of opportunity
- Being an american Citizen

Nigeria does not have the worst education system but my family immigrated here so me and my siblings can have better education and gain our personal independence fast, and have access to a lot of opportunities in America. And to gain the american citizenship comes with so much benefits, like literally being able to enter most countries at any time without needing a visa.
